PREFACE

The Statistical Register of South Australia for 1966-67 has been issued in eight separate parts, and these are bound herein with a general index covering the complete volume. The parts are:—

I—Social
II—Demography
III—Finance
IV—Trade
V(a)—Primary Production
V(b)—Secondary Production
VI—Transport and Communication
VII—Statistical Summary

Detailed tables in this issue generally refer to the calendar year 1966 (Demography), the year ended 31 March 1967 (rural production), and the year ended 30 June 1967 (other statistics). In many instances more recent statistics can be supplied on request.

I acknowledge with thanks the co-operation of Government Departments both State and Commonwealth, business concerns, primary producers, and others, in supplying the basic data from which statistics contained in this volume were prepared; of the staff of this Bureau in the compilation of data and preparation of tabular matter for publication; and of the Government Printer and his staff in the printing of this volume.

Note : Building employment covers all contractors and sub-contractors and employees of contractors, sub-contractors and government instrumentalities who were actually working on the construction, alteration, repair and maintenance of buildings but, *excludes* persons working on owner-built houses or for contractors or sub-contractors who undertake *only* alterations, additions, repair and maintenance.

Persons "actually working" include those temporarily laid off because of weather.

Some duplication may occur as a result of frequent movement between jobs or because some persons (such as electricians) may work on several jobs which are under construction simultaneously.

Industrial Accidents

Statistics in the next four tables have been compiled from reports of claims closed in accordance with provisions of the South Australian Workmen's Compensation Act. Notable exclusions are self-employed persons and all Commonwealth Government employees.

An industrial accident has been defined as a compensated work injury causing death or absence of the injured person from work *for one week or more*, excluding journey cases, cases occurring during a recess period, and disease cases. One week has been interpreted as one week of seven calendar days or five working days.

Population: Full-blood Aborigines

Following the repeal in August 1967 of Section 127 of the Commonwealth Constitution, official figures of population are required to include full-blood Aborigines.

Reporting at the 1966 Census was insufficiently precise to enable a reliable dissection of full-blood and half-blood Aborigines. To provide a comparison in tables showing 1966 Census and later population figures, the 1966 Census figures include full-blood Aborigines, but the difference between inclusive and exclusive figures shown elsewhere should not be interpreted as a reliable measure of the Aboriginal population. Census information regarding Aborigines is to be found in a special Census publication, "The Aboriginal Population of Australia" issued by the Commonwealth Statistician on 16 April 1969.

(*b*) Before 30 June 1966 the Metropolitan Area of Adelaide comprised 21 municipalities. From 30 June 1966 new criteria based mainly on population density have been adopted for all capital cities; the boundary for Adelaide has been extended to embrace new areas including Elizabeth, Salisbury and Tea Tree Gully.

(*c*) To the 1947 Census "Other Urban" comprised all municipalities outside the Metropolitan Area; for the 1954 Census non-municipal towns of 1,000 persons or more were also included; for the 1961 Census non-municipal towns of 1,000 persons or more were included but municipalities of less than 1,000 persons were excluded. For the 1966 Census population clusters of 1,000 or more persons which conformed to a minimum density standard were included.

(*b*) Includes persons who were—

(1) unable to secure employment,

(2) temporarily laid off from their jobs, and

(3) not actively seeking work at the time of the Census on account of sickness or accident, industrial dispute, resting between jobs or for any other reasons.

(*c*) The concept of "in work force" was extended at the 1966 Census. The net effect was to include approximately 14,600 additional persons in the South Australian work force. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as ". . . engaged in an industry, business, profession, trade or service".

(*a*) Population of Adelaide is for the 21 Municipalities comprising the Metropolitan Statistical Division for Census purposes. In most other cases the population of a "locality" is that of a town, plus those persons living in the surrounding area who gave that town as their address on Census returns.

(*b*) The population of the newly defined Adelaide Metropolitan Area (*see* Table 2) at Census 30 June 1966 was 727,916 persons.

(*c*) For the 1954 Census Stirling and Bridgewater were treated as separate non-municipal towns and Aldgate as a separate locality; for the 1961 Census these three areas were combined to form the single non-municipal town of Stirling-Bridgewater; both 1954 and 1961 populations have been adjusted to include persons living near the present non-municipal town.

(*d*) Includes population of adjacent irrigation areas.

(*e*) Includes Thevenard.

(*f*) For the 1954 Census Port Noarlunga and Christies Beach were treated as separate localities; for the 1961 Census they were combined to form a single non-municipal town. Both 1954 and 1961 populations include persons living in adjacent areas.

(*g*) *See* also Salisbury, which adjoins; the area now occupied by Elizabeth was farmland in 1954.

(*h*) Includes Joyce.

(*i*) *See* also Elizabeth, which adjoins.

(*j*) Includes Holder and Ramco.

(*k*) Census 30 June 1966, 22,121 persons.

(*l*) Includes Immigration Holding centre, 1954 (602), 1961 (167); excludes military camp.

(*m*) Includes Maralinga and associated centres.

Note: (1) In the cases of multiple confinements included above the following still births were recorded: twins, nuptial—1957, 5; 1958, 4; 1959, 10; 1960, 2; 1961, 6; 1962, 7; 1963, 5; 1964, 1; 1965, 5; 1966, 2; twins, ex-nuptial—1961, 1.

(2) For registration purposes, where only one child of a multiple pregnancy is live-born, that child is recorded as a single birth, so that it is possible that not all cases of such multiple confinements have been detected. However, the number of multiple births is not significantly affected.

(3) Births of full-blood Aborigines where identified in registrations are excluded.

Note: In 1959 the Commonwealth Parliament passed the *Matrimonial Causes Act* 1959, which came into operation on 1 February 1961. This Act established uniform grounds throughout the whole of the Commonwealth for the termination of marriage and superseded the matrimonial cause laws for the States and Territories except in so far as the transitional provisions of the Act kept them in force for the purpose of completing pending proceedings. The main changes in South Australia were as follows:—

(i) The period of desertion constituting a ground for dissolution of marriage was reduced from three years to two years.

(ii) A petition on the ground of separation for five years does not now require a Court order for judicial separation as a pre-requisite.

(iii) The period of the decree nisi for dissolution or annulment of marriage was reduced from six months to three months.

(*a*) Includes petitions filed for dissolution or nullity of marriage, and for dissolution or judicial separation.

Note : *See* note to Table 49 re change in legislation.

(*a*) At time of petition. Under State legislation information obtained on "children" covered only living "issue" under 16 years ; the Commonwealth Act provides for living "children of the marriage" under 21 years to be shown. As the numbers of orders absolute for dissolution in 1961 to 1966 combine those granted under both the old and the new legislation, the information on children for each of these years is not strictly comparable with that for each previous year.

(*a*) The information in this table does not relate to a uniform year ending 31 December but rather to the companies' accounting periods which ended during the calendar year.

(*b*) Includes adjustments to registers.

General Insurance

DEFINITIONS—These statistics are based upon the definitions stated below and should be interpreted accordingly—

(i) Premiums represent the full amount receivable in respect of policies issued and renewed in the year less returns, rebates and bonuses, paid or credited to policy holders in the year. They are not adjusted to provide for premiums unearned at the end of the year, consequently the amounts shown differ from "earned premium income" appropriate to the year. When figures are increasing, as in recent years, premiums (as shown in the statistics) are greater than "earned premium income" appropriate to the year. The converse applies when figures are declining.

(ii) Claims include provision for outstanding claims and approximate claims or losses incurred in the year.

(iii) Contributions to fire brigades, commission and agents' charges, and expenses of management consist mainly of charges paid in the year.

(iv) Taxation includes income tax, payroll tax, licence fees and stamp duty, and consists mainly of payments made in the year. Amounts included for income tax are based on income of earlier years.

The tables contain selected items of statistics and should not be interpreted as "profit and loss" statements or "revenue accounts". These statistics are not totals for uniform financial years but are aggregates of transactions reported by companies for their relevant financial years ending on various dates from 1 July to 30 June.

Instalment Credit for Retail Sales

The statistics in this table cover the operations of instalment credit schemes which relate primarily to the financing of retail sales of goods.

In general, the term "instalment credit" is defined as relating to schemes in which repayment is made by regular predetermined instalments. Types of schemes covered include hire-purchase, time payment, budget account, and certain personal loan schemes. In the case of large personal loan schemes which include financing retail sales of motor vehicles, arrangements have been made with companies concerned to provide (on a partly estimated basis where necessary) particulars of their personal loan transactions dissected between those relating to retail sales of goods and other transactions; the particulars relating to retail sales of goods are included in these tables. Other personal loan schemes are included only if the schemes relate primarily to financing retail sales of goods.

These statistics do not cover lay-bys, credit accounts not involving repayment by regular predetermined instalments, financing of sales of land and buildings, property improvements, services such as repair work or travel facilities, or rental or leasing schemes.

In these statistics the term "retail sales" relates not only to retail sales of goods by retail establishments coming within the scope of periodic Censuses and Surveys of Retail Establishments conducted by this Bureau, but includes also other sales of goods (such as plant and machinery) to final purchasers.

Northern Territory figures are included in this table.

(*g*) In this classification of instalment credit transactions "retail businesses" include those operating retail establishments which come within the scope of the Censuses of Retail Establishments, and subsidiary finance businesses set up by retailers (or by groups mainly engaged in retail trading) primarily for the purpose of financing their retail sales; "non-retail finance businesses" are all others engaged in instalment credit financing of retail sales of goods irrespective of whether the main activity is finance.

Finance Companies

Finance Companies are defined as incorporated companies whose main activity is providing for businesses and persons the types of credit facilities listed in the following table. Companies are included if half or more of their assets are financial assets relating to the specified types of financing and/or half or more of their income is derived from such assets, with the following provisos: companies which mainly finance their own sales are excluded, and companies whose main activity is leasing, are included only if they are related under the Companies Act to another "Finance Company"; special classes of financial institutions such as banks, insurance and investment companies, building and friendly societies, etc., are also excluded.

Please note that Finance Companies here defined are not equivalent to "non-retail finance businesses" included in Table 34.

The following comments are offered to clarify the content of various items in the table:

(1) The extent to which personal loans schemes are included as Instalment Credit is indicated in the introduction to Table 34.

(2) Wholesale hire purchase relates mainly to the financing of stocks of motor vehicles held under bailment or floor plan schemes but includes also financing of other trading stock.

(3) Contracts including charges are those which have interest and other charges written into the contractual amount at the time of origin of the agreement. Practices in this respect vary between Finance Companies and between types of agreement.

Values—Full definitions of valuation of imports and exports are given at the head of Tables 14 and 15 respectively.

Note: In tables where figures have been rounded, discrepancies between totals and sums of components are due to rounding.

COMMODITY CLASSIFICATIONS

Overseas trade statistics were compiled according to the Statistical Classification of Imports and Exports up to and including 1964-65 for imports and 1965-66 for exports. From July 1965, imports have been classified according to the Australian Import Commodity Classification. Exports have been classified according to the Australian Export Commodity Classification from July 1966. Both classifications are based on the Standard International Trade Classification, Revised, which is closely related to the Brussels Tariff Nomenclature used in the new Australian Customs Tariff introduced in July 1965.

Because of the introduction of the new commodity classifications, commodity group figures for years before 1965-66 for imports and before 1966-67 for exports, are not strictly comparable with those for subsequent periods and must be regarded as estimates only.

SUMMARY OF STATISTICAL CLASSIFICATION

Section Code	Division Code	Section and Division Headings
0		FOOD AND LIVE ANIMALS
	00	Live animals
	01	Meat and meat preparations
	02	Dairy products and eggs
	03	Fish and fish preparations
	04	Cereals and cereal preparations
	05	Fruit and vegetables
	06	Sugar and sugar preparations and honey
	07	Coffee, tea, cocoa, spices and manufactures thereof
	08	Feeding-stuff for animals (excluding unmilled cereals)
	09	Miscellaneous preparations chiefly for food
1		BEVERAGES AND TOBACCO
	11	Beverages
	12	Tobacco and tobacco manufactures
2		CRUDE MATERIALS, INEDIBLE, EXCEPT FUELS
	21	Hides, skins and fur skins, undressed
	22	Oil-seeds, oil nuts and oil kernels
	23	Crude rubber (including synthetic and reclaimed)
	24	Wood, timber and cork
	25	Pulp and waste paper
	26	Textile fibres and their waste
	27	Crude fertilisers and crude minerals (excluding coal, petroleum and precious stones)
	28	Metalliferous ores and metal scrap
	29	Crude animal and vegetable materials, n.e.s.
3		MINERAL FUELS, LUBRICANTS AND RELATED MATERIALS
	32	Coal, coke and briquettes
	33	Petroleum and petroleum products
	34	Petroleum gases and other gaseous hydrocarbons
4		ANIMAL AND VEGETABLE OILS AND FATS
	41	Animal oils and fats
	42	Fixed vegetable oils and fats
	43	Animal and vegetable oils and fats, processed, and waxes of animal or vegetable origin
5		CHEMICALS
	51	Chemical elements and compounds
	52	Mineral tar and crude chemicals from coal, petroleum and natural gas
	53	Dyeing, tanning and colouring materials
	54	Medicinal and pharmaceutical products
	55	Essential oils and perfume materials; toilet, polishing and cleansing preparations
	56	Fertilisers, manufactured
	57	Explosives and pyrotechnic products
	58	Plastic materials, regenerated cellulose and artificial resins
	59	Chemical materials and products, n.e.s.
6		MANUFACTURED GOODS CLASSIFIED CHIEFLY BY MATERIAL
	61	Leather, leather manufactures, n.e.s., and dressed fur skins
	62	Rubber manufactures, n.e.s.
	63	Wood and cork manufactures (excluding furniture)
	64	Paper, paperboard and manufactures thereof
	65	Textile yarn, fabrics, made-up articles and related products
	66	Non-metallic mineral manufactures, n.e.s.
	67	Iron and steel
	68	Non-ferrous metals
	69	Manufactures of metal, n.e.s.
7		MACHINERY AND TRANSPORT EQUIPMENT
	71	Machinery, other than electric
	72	Electrical machinery, apparatus and appliances
	73	Transport equipment
8		MISCELLANEOUS MANUFACTURED ARTICLES
	81	Sanitary, plumbing, heating and lighting fixtures and fittings
	82	Furniture
	83	Travel goods, handbags and similar articles
	84	Clothing and clothing accessories and articles of knitted or crocheted fabric
	85	Footwear, gaiters, and similar articles and parts therefor
	86	Professional, scientific and controlling instruments; photographic and optical goods, watches and clocks
	89	Miscellaneous manufactured articles, n.e.s.

INDEX TO ARTICLES OF TRADE, 1966-67

Entries in this index are arranged in alphabetical order and listed against each entry is an Australian Import and/or Export Commodity Classification reference number of 3, 5 or 7 digits. Where a reference number relates to both imports and exports, no distinction has been made, but in those cases where a reference relates to an import item only or an export item only, this has been indicated by an (I) or an (E) respectively after the number. Those entries which cover a homogeneous group of statistical items have a statistical reference of 3 or 5 digits. Entries not readily associated with a homogeneous group of items, or which are sufficiently important, have a statistical reference of 7 digits. Consequently any article not specifically mentioned in the index is included under its generic heading, e.g., "champagne" is not listed but may be located in the classification through the 5-digit reference for "wine" or the 3-digit reference for "alcoholic beverages".

If an article has more than one reference number and the leading digits of each reference number are identical, the leading digits are shown for the first reference number only, e.g., the entry 512.21, 22, 23, 24, 25 means 512.21, 512.22, 512.23, 512.24 and 512.25.

No. 11—Overseas Imports, South Australia, 1966-67

(For Alphabetical Index to Items *see* page 25)

Note:—With some exceptions items which are nil or less than $20,000 are not shown separately. In some cases they are grouped and in other cases they are included in "other items" at the end of the division.

Value of Imports—The value of goods imported from countries beyond Australia is recorded in Australian currency and represents the amount on which duty is payable or would be payable if duty were *ad valorem*. Section 154 (1) of the Customs Act, 1901-1967, provides that "when any duty is imposed according to value, the value for duty shall be the sum of the following"—

(*a*) (i) The actual money price paid or to be paid for the goods by the Australian importer plus any special deduction; or

(ii) The current domestic value of the goods, whichever is the higher;

(*b*) All charges payable or ordinarily payable for placing the goods free on board at the port of export.

"Current domestic value" is defined as "the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country".

Quantities—Generally, but not invariably quantities have been shown in the ordinary trade unit; where the cental is used, the unit equals 100 pounds avoirdupois. Where imports have been declared in packages without an indication being given of the number, capacity or weight of the articles imported, the values only have been inserted.

N.E.I. ("not elsewhere included") and **N.E.S.** ("not elsewhere specified") refer to articles not covered in other items listed separately in the full Statistical Classification. However, some of the items listed separately in the full Statistical Classification do not appear on this table (see note above).

Restrictions—Details for some items are not available for publication.

No. 12—Overseas Exports, South Australia, 1966-67

(For Alphabetical Index to Items *see* page 19)

Note—With some exceptions items which are nil or less than $20,000 are not shown separately. In some cases they are grouped to show as a section of a class or as a remainder of a section of a class and in other cases they are included in "other items" at the end of a class.

Value of Exports—The value of goods exported (including cost of containers) is recorded in Australian currency and the f.o.b. values have been determined as from 1 July 1937 as follows—

(*a*) Goods sold to overseas buyers before export—the f.o.b. equivalent of the price at which the goods were sold (e.g., as regards wool, the actual price paid by the overseas buyer plus the cost of all services incurred by him in placing the wool on board ship).

(*b*) Goods shipped on consignment—the Australian f.o.b. equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were dispatched for sale (as regards wool, the f.o.b. equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. equivalent of the price ultimately received).

N.E.I. ("not elsewhere included") and **N.E.S.** ("not elsewhere specified") refer to articles not covered in other items listed separately in the full Statistical Classification. However, some of the items listed separately in the full Statistical Classification do not appear in this table (see note above).

Exports to other States—Goods transferred from South Australia to the other States of the Commonwealth for shipment to oversea countries are shown as exports from the State from which the goods were finally dispatched and are not included in the South Australian details.

Ship's Stores—Goods shipped as "ship's stores" on board overseas ships are not included in exports.

Restrictions—Details for some items are not available for publication.

(*a*) First-mentioned figure relates to South Australian Hard, and the second to F.A.Q. standard.

(*b*) Prior to 1905-06 rainfall was calculated by averaging falls recorded at 50 selected stations, and this method would give a higher result than the present method. Refer to the note on page 67 for description of the new procedure for calculating rainfall since 1905-06.

(*c*) Direct overseas exports of cereals and cereal products, the principal items being wheat, barley, oats, and flour, with smaller quantities of peas, split peas, bran, and pollard.

(*d*) Average value per bushel of all wheat to 1960-61, price per bushel of bulk wheat from 1961-62. *See also* Tables 61 to 66 *re* prices and values.

Note: Goyder's Line, which corresponds fairly closely with the 10in rainfall line, is shown on the map at the front of this Part. The area north of the line (originally described by Surveyor-General Goyder in 1865 as land suffering from drought at that time) is now taken as being roughly that portion of the State which is suitable only for grazing.

Note: Holdings for which total gross receipts for the year for all products were estimated at less than $1,600 (after deducting marketing costs) were classified as "sub-commercial"; holdings not used or used for intermittent grazing during the season and holdings attached to prisons, hospitals, etc., were classified as "unused, special, etc.". The remaining holdings were classified as "commercial" and the criteria used in classifying these to "type of activity" were briefly as follows:—

(*a*) Holdings running sheep and growing cereals for grain were classified as "sheep-cereal grain" if the combined receipts from these activities accounted for 75 per cent or more of the total receipts of the holding and provided receipts from sheep were no more than four times and not less than one quarter of receipts from cereals from grain.

(*b*) Holdings running dairy cattle and pigs were classified as "milk cattle" if the combined receipts of these activities was more than half of total receipts of the holding.

(*c*) Other holdings were classified to the activity (if any) which accounted for more than half of total receipts of the holdings.

(*d*) If none of the criteria under (*a*), (*b*), or (*c*) were satisfied, the holding was classified as "multi-purpose".

No. 61—Values of Primary Production, South Australia, 1959-60 to 1966-67

Definitions—

Gross value is the value placed on recorded production at wholesale prices realised in principal markets. Where primary products are absorbed at a local point or become raw material for a secondary industry, the value in each case is presumed to be the value at the principal market. Values include bounties.

Local value is *gross value* less marketing costs, being value at place of production.

Net value is *local value* less the value of materials used in process of production.

No deductions have been made for depreciation or certain maintenance charges.

(*a*) The value shown for primary production is the *net value*, for definition of which *see* page 60. The value of secondary production is the value added in the process of manufacture, *i.e.* the value of output (value of goods produced, including amounts received for work done) less value of materials and fuel used.

AVERAGE RAINFALL OVER AGRICULTURAL AREAS

Average rainfall for each division is calculated by weighting the averages of readings at selected stations within counties by the area under crop in those counties. Counties in which little or no crop is grown are excluded from the calculations. The State figure is obtained by similarly weighting the divisional averages. (*See* the 1961-62 or earlier editions for the method of calculation previously used.)

In a number of counties the area under crop is now negligible, and these counties (listed below) are excluded from recent calculations of rainfall. However, a few of these counties (marked *) were included in calculations for the years 1905 to 1946, and subsequently excluded. It should be noted that County Hamley has been omitted, because crops in this area are almost entirely dependent on irrigation rather than on rainfall.

Excluded counties are Kimberley*, Blachford, Derby, Granville*, Hanson*, Herbert, Lytton, Newcastle*, Taunton, Bosanquet, Hopetoun, Hore-Ruthven, Manchester, York, Hamley, Young.

PERIOD COVERED

The period covered by the statistics in this Part is, in the main, the twelve months ended 30 June. In cases where some other accounting period has been used details have been supplied for that accounting period. These cases, however, are comparatively few, and their inclusion in no way impairs the comparability of the statistics in the year under review or from year to year. The Bureau also collects monthly statistics of certain articles produced and materials used. Because of the variation in annual accounting periods, aggregates of these figures for the twelve months July to June may not agree with annual totals shown herein.

DEFINITIONS

Factory—For the purposes of the accompanying statistics a factory is defined as an establishment in which four or more persons are employed or where power-driven machinery is used in manufacturing, repairing, or assembling. *It should be noted that the details relating to small establishments not classified for statistical purposes as factories are not included in the figures shown herein.*

Average Number of Persons Employed—All persons employed in the manufacturing activities of a factory are counted as factory employees. The figures relating to employment, therefore, exclude all those engaged in selling and distribution, such as salesmen, travellers, collectors, carters engaged solely on outward delivery of manufactured goods, and retailing storemen. The figures, however, include proprietors who work in their own businesses and "out-workers".

The average number of persons employed is quoted on two different bases; the average during the period of operation and the average over the whole year. Of these, the former is simply the aggregate of the average number of persons employed in each factory during its period of operation (whether the whole or only part of the year); this average is used only in respect of details relating to classification according to number of persons employed. The latter, which is used in all other instances, is calculated by reducing the average number working in the factories (irrespective of period of operation) to the equivalent number working for a full year.

Working Proprietors are included in all employment figures other than those relating to age dissections, but in all cases drawings by working proprietors are excluded from *salaries and wages paid*.

Value of Premises and Machinery—The values shown include an allowance for rent capitalised where premises and machinery are not owned by the occupiers.

Costs of Production—This item includes the value, in the usual sense, of the materials used, stores used, containers, tools replaced, materials used in repairs to plant, and the cost of power, light, lubricants, and water used. In general, it does not include the value of customers' articles or materials repaired, assembled, or treated by the factory.

Value of Output—The value of factory output is the value of the goods manufactured or their value after passing through the particular process of manufacture and includes the amount received for repair work, work done on commission, and receipts for other factory work. The basis of valuation of the output is the selling value of the goods at the factory exclusive of all delivery costs and charges and excise duties but inclusive of bounty and subsidy payments to the manufacturer of the finished article.

Value of Production—The value of production is the value added to raw materials by the process of manufacture. It is calculated by deducting from the value of factory output the value (at the factory) of materials, containers, packing, power, fuel and light used, tools replaced, and materials used in repairs to plant (but not depreciation charges).

In the process of manufacture many goods are treated in several industries, the output of one becoming the raw materials of another, so that such commodities are counted more than once in the aggregate value of output and of raw materials. Examples are raw sugar passing from the mills to the refinery, metals from the smelters which become raw materials in establishments concerned in the production of metal goods, and timber from the sawmills used in furniture factories and in joinery. On the other hand, the aggregate value of production is assessed without duplication, the value added by each industry being taken into account once only. For this reason the value of production, and not the value of the output, is used as a measure of activity in the manufacturing industries as a whole.

There are many miscellaneous expenses, such as maintenance of buildings, depreciation, workers compensation insurance, other insurances, pay-roll tax, income tax, advertising, interest on borrowed money, bad debts, and many other sundry charges, which are not taken into account. Consequently it must not be inferred that when wages and salaries are deducted from value of production the whole of the surplus is available for interest and profits.

Rated Horse-power of Engines Used—Statistics of power used in factories other than central electric stations relate to the "rated horse-power" of engines ordinarily in use and of engines in reserve or idle, omitting obsolete engines. In the case of central electric stations the figures refer to the "rated horse-power" of engines used to drive electric generators.

NOTE—From 1940-41 particulars for electricity and gas undertakings refer to generation only. Details of distribution and transmission (in 1940-41 covering approximately 1,500 persons, $800,000 in salaries and wages, and $1,400,000 value of production), which were previously included, are now excluded.

No. 16—Factories: Principal Articles Produced, 1962-63 to 1966-67

Particulars shown in this table represent total recorded factory production in South Australia of the listed articles and are presented alphabetically. It should be noted that the production of small establishments not classified for statistical purposes as factories is not included in the figures shown herein. Values shown represent the selling value at the factory excluding delivery costs and charges and excise duty where applicable. There are three standard notes throughout the table, *viz*—

(*a*) "Not available for publication" (figures confidential);

(*b*) "Quantity only available" (values not available owing to the inclusion, in the quantity produced, of—

(i) articles assembled—no values recorded;

(ii) articles produced on commission—no values recorded; or

(iii) Quantities produced and used in the same year in further processes in the works producing them).

In the case of (iii), this is indicated either by a separate figure or, where a separate figure cannot be given, by the third standard note, *i.e.*—

(*c*) "Includes quantities produced and used in works producing them".

Details of a large number of items produced in South Australian factories have been withheld from publication because of the necessity of concealing details of the activities of individual producers (the Census and Statistics Act requires all such information to be treated as strictly confidential). Many of these articles are produced in significant quantities and are valued in terms of $ millions. The most important of these are air conditioners, asbestos cement goods, beer, cardboard, cement, electrical cable and wire, gas, motor accessories and parts, motor vehicles, pig iron, refrigerators, safety glass, steel ingots, ships and boats, sodium salts, steel, sugar, sulphuric acid, television and radio sets, wool tops, and yarns (cotton, woollen and worsted).

(*a*) The depth shown against wharves is the greatest at present available and may be found at one berth only at the wharf or jetty concerned.

(*b*) Mean tide rises are shown as higher high water and lower high water, rather than as high water springs and neaps. This is the method of measuring tides which are predominantly diurnal rather than semi-diurnal in nature.

(*c*) No approach channel.

(*d*) Deep water gradually shoaling to depth at wharf.

(*a*) Estimates advised by Highways and Local Government Department.

(*b*) Includes roads and tracks outside local government areas.

NOTE—Details in Tables 7 to 10 show the total volume of shipping (overseas, interstate and intrastate) entered at, or cleared from, ports in South Australia. Each column headed "Intrastate", "Interstate", "Overseas" contains details of vessels engaged on that division of trade at the time of the entrance or clearance at the port concerned. The statistics therefore show a classification of total movements of vessels at each port and not a classification of the vessels themselves. In Table 11 only the first port of arrival and final port of departure are recorded.

Table 7 covers all South Australian ports while in Tables 8 to 11 details of customs ports only are included: a complete list of these ports is shown in Table 9.

Statistics in Tables 8 to 11 relate to trading vessels of more than 200 net tons.

(*a*) A liner is a vessel which, on the voyage on which cargo is loaded or discharged at a South Australian port, is operated by a common carrier in providing services on a specified route on a relatively regular basis: a single vessel may be classed as a liner on one voyage and as a tramp on another voyage.

Note: Cargo is recorded in terms of either units of weight or units of measurement (a ton measurement is a unit of 40 cubic feet) depending on the basis on which freight is charged. The statistics in Tables 13 to 15 show separate figures for cargo recorded in tons weight and for cargo recorded in tons measurement. The aggregates for weight and measure cargo are not added to a figure for total cargo because they are unlike quantities, and comparisons of total cargo between ports, trade routes or periods of time could be affected by variations in the cargo mix and in the basis on which freight is charged.

Note: Following the repeal in August 1967 of Section 127 of the Commonwealth Constitution, official figures of population are required to include full-blood Aborigines. Figures for 1966 (excepting natural increase and total increase) and 1967 therefore include details of full-blood Aborigines.

(a) At date of census. (b) Northern Territory (census populations being: 201 in 1871, 743 in 1876, 3,451 in 1881 and 4,898 in 1891) included prior to 1901, but subsequently excluded. (c) During the 1914-18 war, defence personnel leaving the State were treated as departures, but during the 1939-45 war they were retained in the population, and troops of other States and Countries were excluded. Deaths of defence personnel (*viz* 5 in 1939, 19 in 1940, 411 in 1941, 1,024 in 1942, 800 in 1943, 480 in 1944, 419 in 1945, 33 in 1946 and 9 in 1947) have not been deducted in arriving at natural increase. (d) Boundaries slightly altered. (e) From 30 June 1966 the metropolitan area boundary was extended to embrace new areas including Elizabeth, Salisbury and Tea Tree Gully. *n.a.*—Not available

Note: Gross value shown in previous Table is defined as the value placed on recorded production at the wholesale price realised in the principal markets. Local value excludes marketing costs, freight, commission, containers, etc. Net value also excludes materials used such as stock feed, seed, manures, etc. (thus eliminating duplications).

(*a*) Includes iron ore valued at $9 per ton from 1955-56 (previously $2.30).

(*a*) Incomplete coverage prior to 1920.

(*b*) Gross values of estates prior to 1912.

(*c*) From 1932 figures relate to the year ended 30 June, except that revenue and expenditure shown for 1932 are for the 18 months ended 30 June 1932.

(*d*) Not collected.

(*e*) The balance dates of all societies are not the same. From this year figures are aggregates of returns for financial years which ended during the twelve months ended 30 June. Although different cut off dates were used in previous years, there has been little effect, if any, on comparability of figures.
